“ The Entity of Source ”

Since SIT's inception, our goal has been to serve as a tool for the Kingdom of Saudi Arabia's 2030 vision for digital transformation and technical growth.

SIT Company launched in 2012 with a mission to achieve excellence and simplicity in operational performance by encouraging the development of technical infrastructure for all business owners.

Why SIT?

More than 1,000 firms have selected SIT to replace outdated systems with cutting-edge software solutions that improve information transfer efficiency, flexibility, and accuracy with a single click. In order to achieve a small and adaptable model for the nature of the business, we can also design solutions that are tailored to the demands of the customer.

Prepared for a smart solutions?

- Modern digital technology.
- Top-notch customer service.
- The most reliable databases.
- The highest standard of cyber security.

“ Enterprise Resource Planning (ERP) system ”

A software system for enterprise resource planning (ERP) can be referred to as "the central nervous system of an enterprise" since it offers the automation, integration, and intelligence needed to effectively manage all daily business processes. To offer a single source of truth throughout the business, the majority or all of an organization's data should be housed in the ERP system.

ERP SYSTEM
